

MOTOROLA DS6707-HD

HANDHELD DIGITAL IMAGER SCANNER

VERSATILE SCANNER BRINGS AFFORDABLE HIGH DENSITY BAR CODE SCANNING TO ELECTRONIC COMPONENT ASSEMBLY

The affordable Motorola DS6707-HD brings a new level of efficiency to electronic component manufacturing by enabling the automated capture of virtually every type of bar code utilized in electronics manufacturing. The DS6707-HD supports the complete set of high density marks common in electronics manufacturing environments, including laser etched, ink marked, chemical etched and inkjet bar codes. Tuned to address the unique challenges in electronics component assembly, the DS6707-HD scanner is optimized to accurately capture high density and low contrast marks, including black bar codes on white backgrounds; white bar codes on black backgrounds; and etched bar codes with a very low contrast tone-on-tone effect — where there is very little difference in color between the mark and the background material on which it is printed.

ADD BAR CODE SCANNING AND IMAGING FOR COMPREHENSIVE DATA CAPTURE CAPABILITIES IN A SINGLE DEVICE

In addition to direct part marks, the versatile DS6707-HD offers support for 1D and 2D bar codes, enabling workers to scan bar codes that are printed directly on the electronic assembly as well as paper labels — with just one device. In addition, workers can easily document damaged components or assemblies in seconds with the integrated high resolution 1.3 megapixel image sensor.

EASY TO USE

The easy-to-use device requires virtually no training — regardless of whether your workers are decoding a bar code or capturing an image. The omni-directional scan pattern allows marks to be presented at any angle. A viewfinder provides true first-time accurate point-and-shoot aiming for image capture. And the optional Intellistand provides the ability to dynamically switch between handheld and hands-free modes as needed, providing maximum application flexibility.

RAPID RETURN ON INVESTMENT (ROI)

The rich functionality of DS6707-HD significantly reduces capital and operational expenses. Enterprises can standardize on a single device for the capture of multiple data types — including challenging direct part marks and dirty or damaged bar codes. The technology infrastructure is simplified — there is no need to purchase, manage and support additional devices, such as digital cameras and separate bar code scanners for different symbologies.

To help you protect your investment and maintain peak performance, Motorola offers Service from the Start Advance Exchange Support for the Motorola DS6707-HD. This multi-year agreement helps protect product uptime with next-business-day delivery of a replacement device. In addition, this service includes Motorola's unique Comprehensive Coverage, which includes normal wear and tear as well as coverage for internal and external components damaged through accidental breakage at no additional charge — significantly reducing your unforeseen repair expenses.

FEATURES

1.3 Megapixel imaging (1280 x 1024)

High resolution image sensor for robust image capture and bar code scanning; captures 1D bar codes down to 3 mil density and 2D bar codes down to 2mm x 2mm and as dense as 4 mils

Support for all major 1D, PDF, postal, 2D and DPM symbologies

Delivers application flexibility; eliminates need for multiple devices — and associated costs

RSM (Remote Scanner Management) Ready

Reduces total cost of ownership by enabling remote, network-based device management

Integrated viewfinder

Enables first time accurate aiming for image capture

6 ft./1.8m drop specification, tempered glass exit window

Designed to endure the rigors of everyday use for maximum reliability and uptimes; reduces downtime and TCO

MOTOROLA DS6707-DP

HANDHELD DPM DIGITAL IMAGER SCANNER

CAPTURE 1D AND 2D BAR CODES, IMAGES AND THE MOST CHALLENGING DIRECT PART MARKS — WITH A SINGLE DEVICE

The Motorola DS6707-DP is a premier general purpose scanner, offering the maximum in data capture flexibility. The Motorola DS6707-DP is able to capture images and read virtually all 1D and 2D bar codes and direct part marks (DPM) — including the most challenging mark, dot peen. This highly versatile device is ideal in industries that depend on a wide variety of data types, such as healthcare, aerospace and automotive. With the DS6707-DP, workers can capture the right information at the right time, driving inefficiencies and errors out of business processes — improving accuracy as well as employee productivity.

SETS A NEW BAR FOR DPM FUNCTIONALITY

Comprehensive patented features enable the capture of literally every type of direct part mark (DPM), regardless of size, surface, contrast or density — including dot peen as well as laser etch, ink mark, chemical etch, inkjet mold, cast and thermal spray. The high-resolution 1.3 megapixel image sensor is capable of capturing very tiny and very dense codes. Advanced illumination provides the multiple lighting effects required to capture marks on any type of surface. The built-in diffuser provides the indirect light required to capture marks printed on very shiny and reflective surfaces. The proprietary design of the diffuser also directs additional lighting to the edges of bar codes marked on a curved surface, enhancing the image for easier decoding. Finally, a glancing direct light mode provides the bright light required to successfully read low contrast bar codes marked on any type of surface, including challenging polished materials.

EASY TO USE

The Motorola DS6707-DP is easy to use and requires virtually no training — regardless of whether your workers are capturing a standard bar code or a direct part mark. The omni-directional scan pattern allows marks to be presented at any angle. A viewfinder and aiming bulls-eye facilitates accurate point-and-shoot aiming for image capture. And the optional Intellistand provides the ability to dynamically switch between handheld and hands-free modes as needed, providing maximum application flexibility.

RAPID RETURN ON INVESTMENT (ROI)

The rich functionality of DS6707-DP significantly reduces capital and operational expenses.
